

Acoustics for Musicians and Recordists --- final review

Chapter 1. Motion, Energy, Waves, and Other Physical Principles

- 1.1 Distance
- 1.2 Speed and Velocity
- 1.3 Graphing Motion
- 1.4 Acceleration
- 1.5 Force, Mass, and Newton's Laws
- 1.6 Pressure
- 1.7 Work and Energy
- 1.8 Power
- 1.9 Units

Chapter 2. Vibrating Systems

- 2.1 Simple Harmonic Motion
- 2.2 Energy and Damping
- 2.3 Simple Vibrating Systems
- 2.4 Systems with Two or Three Masses
- 2.5 Systems with Many Modes of Vibration
- 2.6 Vibrations in Musical Instruments
- 2.7 Complex Vibrations: Vibration Spectra

Chapter 3. Waves

- 3.1 What is a Wave?
- 3.2 Progressive Waves
- 3.3 Impulse Waves: Reflections
- 3.4 Superposition and Interference
- 3.5 Sound Waves
- 3.6 Wave Propagation in 2D and 3D
- 3.7 The Doppler Effect
- 3.8 Reflection
- 3.9 Refraction
- 3.10 Diffraction
- 3.11 Interference

Chapter 4. Resonance

- 4.1 Resonance of a Mass Spring Vibrator
- 4.2 Phase of Driven Vibrators
- 4.3 Standing Waves on a String
- 4.4 Partials, Harmonics, and Overtones
- 4.5 Open and Closed Pipes
- 4.6 Acoustic Impedance
- 4.7 Helmholtz Resonators
- 4.8 Sympathetic Vibrations: Soundboards

Chapter 5. Hearing

- 5.1 The Hearing Function
- 5.2 Structure of the Ear
- 5.3 Signal Processing in the Auditory System
- 5.4 Critical Bands
- 5.5 Binaural Hearing and Localization
- 5.6 Measuring Sensations: Psychoacoustics
- 5.7 Logarithms and Powers of Ten
- 5.8 Subjective Attributes of Sound

Chapter 6. Sound Pressure, Power, and Loudness

- 6.1 Sound Pressure Level
- 6.3 Multiple Sources
- 6.4 Loudness Levels
- 6.6 Loudness of Complex Tones: Critical Bands
- 6.8 Musical Dynamics and Loudness
- 6.9 Masking
- 6.10 Loudness Reduction by Masking
- 6.11 Loudness and Duration: Impulsive Sounds and Adaptation

Chapter 7. Pitch and Timbre

- 7.1 Pitch Scales
- 7.2 Pitch Discrimination
- 7.3 Pitch of Pure Tones
- 7.4 Pitch of Complex Tones: Virtual Pitch
- 7.7 Absolute Pitch
- 7.8 Pitch Standards
- 7.9 Timbre or Tone Quality
- 7.10 Fourier Analysis of Complex Tones

Chapter 8. Combination Tones and Harmony

- 8.1 Linear Superposition
- 8.2 Phase Angle
- 8.3 Combination of Two Simple Harmonic Motions
- 8.4 Pure Tones with Slightly Different Frequencies: Beats
- 8.6 Combination Tones
- 8.7 Modulation of One Tone by Another
- 8.9 Origin of Difference Tones
- 8.10 Consonance and Dissonance: Harmonic Intervals
- 8.13 The Central Nervous System: Autocorrelation and Cross Correlation

Chapter 10. String Instruments

- 10.2 Vibrations of a Plucked String
- 10.3 Vibrations of a Bowed String
- 10.6 The Bridge
- 10.7 Other Bowed String Instruments
- 10.8 Music and Physics: A New Family of Fiddles
- 10.9 Construction of the Guitar
- 10.10 The Guitar as a Vibrating System
- 10.11 Vibrations of the Top Plate, Back Plate, and Air Cavity
- 10.12 Resonances of the Guitar Body
- 10.13 Sound Radiation
- 10.14 The Electric Guitar

Chapter 11. Brass Instruments

- 11.1 Instruments of the Brass Family
- 11.2 Oscillations in a Pipe
- 11.3 Pressure-Controlled Valves
- 11.4 The Bell and Mouthpiece

Chapter 12. Woodwind Instruments

- 12.1 How a Pipe-Reed System Vibrates
- 12.2 Tone Holes
- 12.3 Bore Types
- 12.8 Oscillating Air Streams and Whistles

Chapter 13. Percussion Instruments

- 13.1 Thin Bars
- 13.3 Bars with Cutouts
- 13.6 Membranes
- 13.7 Timpani
- 13.10 Vibration of Plates

Chapter 14. Keyboard Instruments

- 14.1 Construction of the Piano
- 14.2 Inharmonicity of Piano Strings
- 14.3 The Tuning of Unisons
- 14.5 Hammer-String Interaction
- 14.6 The Clavichord
- 14.7 The Harpsichord
- 14.8 The Harp
- 14.9 The Pipe Organ

Chapter 15. Speech Production

- 15.1 The Vocal Organs
- 15.2 The Larynx and the Vocal Cords

- 15.3 The Vocal Tract
- 15.5 Resonances of the Vocal Tract: Formants
- Chapter 17. Singing
 - 17.1 Formants and Pitch
 - 17.2 Differences Between Spoken and Sung Vowels
- Chapter 20. Microphones and Loudspeakers
 - 20.1 Microphones as Transducers
 - 20.2 Velocity Microphones
 - 20.3 Unidirectional Microphones
 - 20.4 Microphone Impedance
 - 20.5 Microphone Sensitivity
 - 20.6 Loudspeakers as Transducers
 - 20.7 Structure of Dynamic Loudspeakers
 - 20.8 Air Suspension
 - 20.9 Baffles and Enclosures
 - 20.10 Horn Loudspeakers
 - 20.11 Multispeaker Systems
 - 20.13 Loudspeaker Efficiency
- Chapter 28. Digital Techniques for Generating and Recording Sound
 - 28.1 Music by Numbers: Digital Representation of Sound
 - 28.2 Sampling and Digital Conversion
 - 28.3 Aliasing
 - 28.4 Quantization Error and Dither
 - 28.10 Compact Disc Digital Audio
- Chapter 23. Auditorium Acoustics
 - 23.1 Sound Propagations Outdoors and Indoors
 - 23.2 Direct, Early, and Reverberant Sound
 - 23.3 Direct and Early Sound: the Precedence Effect
 - 23.4 Reverberant Sound
 - 23.7 Criteria for Good Acoustics
 - 23.8 Background Noise
 - 23.10 Variable Acoustics
- Chapter 21. The Recording and Reproduction of Sound
 - 21.6 Magnetic Tape Recording
 - 21.7 Tape Speed and Frequency Response
 - 21.8 Bias and Equalization
 - 21.9 Tape Noise
 - 21.10 Multiple Tracks
